

DANA ROCHA

dbridgette.rocha@gmail.com | [linkedin.com/in/rochadana](https://www.linkedin.com/in/rochadana) | github.com/dana-rocha | dana-rocha.com

TECHNICAL SKILLS

Languages & Frameworks: Python (Apache Airflow, Flask), JavaScript (React, Material UI), HTML, CSS (Materialize), SQL, R
Tools & Platforms: Git, GitHub, AWS, VS Code, Unix/Linux, REST APIs, CI/CD, Docker, RStudio, Firebase
Databases: PostgreSQL, MongoDB, Google Firestore

WORK EXPERIENCE

Allen Institute

Seattle, WA

Data Analyst I - Allen Institute for Brain Science

Mar 2023 – Present

- Designing and implementing an automated AWS-based data processing pipeline using Apache Airflow and Python, collaborating with software engineering team to ensure efficient, reliable execution
- Submitted and managed batch dataset executions via Code Ocean, ensuring correct inputs and reproducibility while supporting development of an internal user-facing application
- Enhanced an internal Python package by adding a method to streamline data report exports and expanding SQL queries with richer metadata, improving transparency into data processing outputs
- Developed a user-friendly Shiny web application, optimizing weekly data analysis by 30% through automated data updates and expedited access to metadata across multimodal metadata
- Improved front-end functionality across 10+ Shiny web applications that centralize data extraction, visualization, and analysis, increasing usability and stakeholder adoption through iterative feedback and collaboration
- Led planning and execution of 25+ Women in Tech Employee Resource Group (ERG) programs for 2024-2026, coordinating stakeholders and resources to deliver high-impact initiatives that strengthened employee engagement

Software Engineer Intern - Allen Institute for Neural Dynamics

Aug 2022 – Jan 2023

- Led end-to-end development of a Minimum Viable Product (MVP) web application, influencing organizational adoption of a new data-sharing solution
 - Designed a responsive front-end user interface using React components and a service layer for REST API queries
 - Synthesized requirements from stakeholders and produced wireframes to guide web application design
 - Implemented unit tests, test automation, and continuous integration through Jest, ESLint, and GitHub Actions
- Added credential file automation to an open-source Python package, simplifying secure resource access
- Integrated dataset search via third-party REST API in an open-source Python package, streamlining data discoverability
- Incorporated features for JSON schema validation and export into an open-source Python package, allowing users to define reusable metadata templates

Merck & Co.

Boston, MA

Informatics Intern

Jan 2020 – Aug 2020

- Trained machine learning models to predict high-value compounds for early-phase testing, supporting data-driven decisions for three active drug discovery teams
- Built ETL pipelines using Oracle DBMS, SQL, Pipeline Pilot, and PilotScript to integrate data from public and internal sources, enabling downstream analysis and supporting data-driven decision making across the organization
- Presented monthly data insights to 50+ stakeholders, ensuring alignment with strategic objectives

TECHNICAL PROJECTS

Room Reservation System, Capstone project – [GitHub](#)

Aug 2022

Web application to track room reservation information - developed with JavaScript, React, Google Firebase

- Collaborated closely in a two-person team to design, develop, and successfully deliver the project
- Wrote backend logic, database endpoints, and secure user authentication
- Crafted algorithms to create, delete, and prevent double-booking of reservations
- Established a responsive user interface of 3 pages utilizing Materialize and React Router for optimal user experience

EDUCATION

Ada Developers Academy

Seattle, WA

Full Stack Web Development & Computer Science Fundamentals

Mar 2022 – Jan 2023

Technologies: Python, JavaScript, SQL, PostgreSQL, Flask, React

Northeastern University

Boston, MA

B.S. in Biochemistry, M.S in Bioinformatics

2018, 2020

Relevant Courses: Algorithms, Data Mining/Machine Learning, Python Programming
